

Tools Needed: Screwdriver, wrench

Instructions:

1. Remove protective film from trap and door.
2. Install rubber backer (#2) in trap (#1) using supplied double-sided tape (#4). Be sure to line up holes in backer with holes in trap.
3. Install door (#3) on trap using the supplied screw (#5) and lock-nut (#6). Door should be on the **INSIDE** of the trap. Snug the screw in the nut, and then back it off slightly so that the door slides freely up and down without too much wiggle.
4. Hang trap/door assembly on the wall using a common picture hanger or drywall anchor.
5. Place cardboard target (#7) on trap by aligning slots in the target with hooks on the trap. The trap and be gently bent by hand if the hooks and slots do not line up perfectly.

For other instructions, visit www.ic13.us/productsupport/

WARNING: Always remove real firearms and ammunition from the area during use!

WARNING: Always wear eye protection when using this product! Ricochets are possible when using a badly worn cardboard target. Always change targets when large holes begin to form.

ITEM NO.	PART NUMBER	DESCRIPTION	QTY.
1	100250	Trap	1
2	100251	Backer, Rubber, FAT Trap	1
3	100252	Door	1
4	100253	Adhesive Tape, Double Sided	3
5	100262	Screw, 1/4"-20 x 1/2"	1
6	100263	Locknut, 1/4"-20	1
7	500251	Target, Cardboard, with Slots	5
